PROFESSIONAL SUMMARY

MERN Stack Developer with a strong foundation in frontend and backend web development. Skilled in JavaScript, React.js, Node.js, Express.js, MongoDB, and Mongoose, with experience building responsive, full-stack web applications. Along with FastAPI, RAG (Retrieval-Augmented Generation), LangChain, and ChromaDB, with hands-on experience building AI-powered applications. Currently expanding my skills into Generative AI and Agentic AI, with a strong motivation to build real-world applications, explore emerging technologies, and continuously strengthen my software development skills.

EDUCATION

Green Valley Senior Secondary School, Bhopal

Computer Science | 12th | Feb 2026 - Mar 2027

PROJECTS

AskMyPDF: AI-Powered PDF Q&A Application | [GitHub](#)

Python, FastAPI, LangChain, RAG, ChromaDB, React

- Built a full-stack **RAG** application that allows users to upload PDF documents and ask natural-language questions about their content.
- Developed a two-stage retrieval pipeline combining vector similarity search with **cross-encoder reranking** to select the most relevant document chunks for LLM context.
- Integrated **HuggingFace** embeddings with **ChromaDB** for semantic search and persistent vector storage.
- Implemented grounded answer generation using **Groq LLM inference**, restricting responses to retrieved document context to minimize hallucinations.
- Built a **FastAPI** backend integrated with a **React + Vite** frontend, including new-session functionality for fresh document Q&A sessions.

Havenly: Full-Stack Accommodation Platform | [Live-Link](#)

React.js, Node.js, Express.js, MongoDB, REST API

- Built and deployed a full-stack accommodation platform with property listings, search, filtering, pagination, and bookings.
- Implemented robust authentication and authorization, including JWT authentication, email verification, password recovery, protected routes, and token refresh.
- Integrated **Stripe payment gateway** for secure payments and enhanced the platform with booking & reservation pages.
- Developed RESTful APIs using **Node.js, Express.js, MongoDB, and Mongoose** for user, property, and booking management.
- Users can book properties, and both users and owners can cancel bookings with proper validations and refund handling.
- Integrated image uploads and built a responsive **React.js** interface for a seamless experience across devices.

TECHNICAL SKILLS

Programming:	JavaScript, Python
Frontend:	HTML5, CSS3, React.js
Database:	MongoDB, Mongoose
Backend:	Node.js, Express.js, REST APIs
AI:	RAG, LangChain, LangGraph, ChromaDB
Tools:	Git, GitHub, Postman, Vercel, Render
